you deserve!**

The census provides critical data that lawmakers, business owners, teachers, and many others use to provide daily services,

products, and support for you and your community. Every year, billions of dollars in federal funding go to hospitals, fire departments, schools, roads, and other resources based on census data.

The results of the census also determine the number of seats each state will have in the U.S. House of Representatives, and they are used to draw congressional and state legislative districts.

Gov. Sununu Signs Bill Cementing COVID-19 Telemedicine Rules Into State Law

Governor Chris Sununu has signed a bill that makes permanent some parts of the expanded telehealth system put in place for COVID-19. The bill requires equal insurance coverage for medical

visits done remotely and in person, including for Medicaid users. It also adds parameters for telehealth to state law, including spelling out where and how treatment can be given and received.

Groups and advocates that joined a new state Health Care Consumers & Providers COVID-19 Coalition say the pandemic has jumpstarted a telemedicine system that's long overdue in New Hampshire.
