Important Vaccine Update from Paul

As you know, the vaccine distribution process is impacted by many factors and is a constantly evolving process. We have been made aware of some changes to the vaccine roll-out as it pertains to our clients and their families.

Originally, all I/DD individuals were included in the vaccine plan for 1b, but that guidance recently shifted, as reflected in the infographic we recently shared ([Click Here to See Infographic](#)). This was the first time that we became aware of the change.

We have been actively advocating for a return to the original plan to prioritize vaccines for anyone with I/DD in the state who wish to receive it. We are hoping to learn more in the coming days, and we will continue to keep you posted as new information emerges.

Governor Sununu is conducting a press conference to discuss updates and evolutions to the vaccine process and we plan to tune in; we encourage you to tune in, too, as this will be the most current vaccine information.

The press conference will be held today at 3:00pm and you can view it on WMUR TV, wmur.com, or the WMUR mobile app. We are hoping to get clarity about the phases today and we will continue to share information as it becomes available.

Be well,
Paul
