Updated Masking Guidance

As community rates of transmission of COVID-19 continue to decline, and we look at shifting the Agency phase once again, it is also time to update our mask guidance. Effective July 6th, the Agency will no longer require the use of masks indoors for vaccinated clients, staff, family, or other visitors. This guidance also includes the following:

- Clients should continue to keep up-to-date vaccination records with their case manager.
- Families and visitors are asked to wear a mask if they are not vaccinated and spending time indoors with Agency staff; they will not be asked to demonstrate proof of vaccination.
- The Agency will continue not to require masks outdoors for any clients, staff, or visitors.
- Please note, If masking is required at a client's work-site or at a community location, TMC staff and clients will be expected to meet that location's requirements for masking.
- Hand hygiene and health screening/temperature checks are still necessary elements that must continue in order to support this change.

Of course, if individual risks remain high, those with specific health needs

will continue to be supported by use of masks.

We are confident that the buildings are ready to welcome this change, as upgraded ventilation systems, hand sanitizer, masks, marked distancing/spacing, and safety reminders have been implemented throughout the buildings.

Our consistent approach has been to balance the safety of our clients, families, and workforce with the evolving information, vaccination rates, and community transmission of the virus. The Agency will continue to review and update the masking protocol as guidance evolves, and will have a formal review at the end of the summer.

Please reach out with any questions and I look forward to an opportunity to see you soon.
